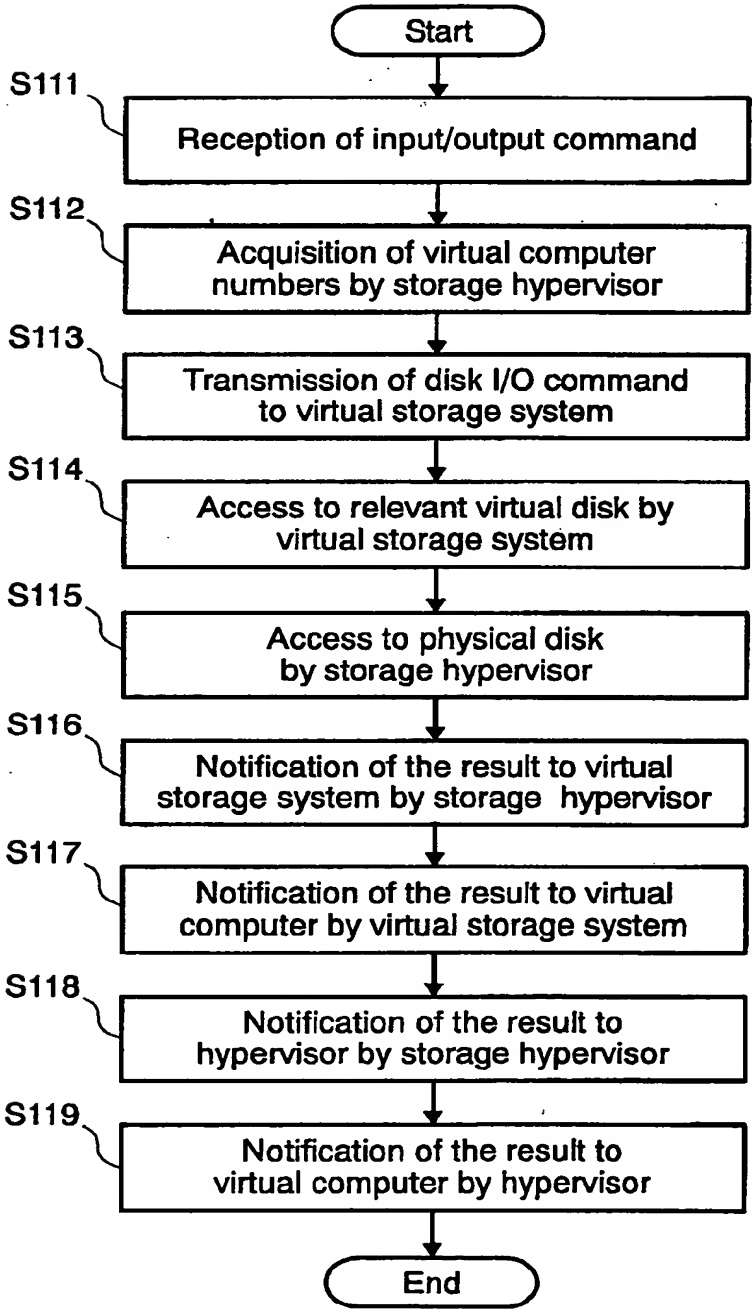
Start
S101
User allocation of resources to virtual computers
S102
Transmission of resources allocation data to server system
S103
Creation of virtual computers in server system according to allocation data
S104
Notification of creation of virtual computers to control terminal
S105
Transmission of resources allocation data to storage system
S106
Creation of virtual storage systems in storage system as per allocation data
S107
Notification of creation of virtual storage systems to control terminal
End

FIG.7



Start
S111
Reception of input/output command
S112
Acquisition of virtual computer numbers by storage hypervisor
S113
Transmission of disk I/O command to virtual storage system
S114
Access to relevant virtual disk by virtual storage system
S115
Access to physical disk by storage hypervisor
S116
Notification of the result to virtual storage system by storage hypervisor
S117
Notification of the result to virtual computer by virtual storage system
S118
Notification of the result to hypervisor by storage hypervisor
S119
Notification of the result to virtual computer by hypervisor
End
